New York, New York

SKILLS

Ruby, Ruby on Rails, JavaScript, Node.js, jQuery, React.js, Redux, SQL, Git, HTML5, CSS3, Visual Basic 6

EXPERIENCE

Manager of Systems Administration

Mel S Harris and Associates / Stephen Einstein and Associates, PC

2002 – 2017

- Pioneered an automation solution to enable our attorneys to load up the correct documentation automatically, increasing their efficiency by 4 fold. - Visual Basic 6, MySQL
- Reduced our backup times 85% to 10 hours by recreating our document storage solution by implementing a proprietary document storage database. - Visual Basic 6, MySQL
- Devised a proprietary automated dialer that can accommodate up to 24 simultaneous calls and integrated with our PBX (internal phone system), improving productivity by at least 50% while shielding the company from subscription fees. - Visual Basic 6, MySQL, telephony tech
- Orchestrated a technical merger of the two companies under one roof. Accomplished over a 3 day weekend while simultaneously relocating the firms to achieve minimal downtime. Maintained the configuration for one year while planning a conversion.
- Increased efficiency two-fold and reduced business expenses and staff by creating tools to export the data from Mel S Harris' proprietary database system to allow for a migration.

PORTFOLIO

WeMeet

[Live](#) | [Github](#)

Single Page application inspired by meetup.com utilizing Rails, PostgreSQL, and React

- Leverages Rails partial views and React components to DRY up the code base.
- Overhauled our storage to store all user submitted images within AWS S3.
- Implemented a RESTful API with to perform site's CRUD functionality utilizing JSON as the data format.

Record Conjurer

[Github](#)

A light-weight ORM inspired by Ruby on Rails Active Record written in Ruby and connects to SQLite databases

- Utilized metaprogramming techniques to allow users to semantically define relationships between various models to denote various kinds SQL joins.
- Abstracts away the complex SQL queries and associations making data easy to retrieve.

EDUCATION

App Academy

Fall 2018

- 1000-hour immersive full-stack web development intensive with <3% acceptance rate
- Topics include: TDD, scalability, algorithms, OOP, coding style, REST, security, single-page apps, and web development best practices.
